BILL HAUVER

Senior IT Leader | DevOps, Cloud Infrastructure, Artificial Intelligence & Software Architecture

Lutz, FL 33558 | 813-455-1589 | whauver@gmail.com

PROFESSIONAL SUMMARY

Senior IT leader with 30+ years of experience spanning DevOps, cloud infrastructure, software architecture, and quality assurance, including 10+ years in senior management. Proven record of building and scaling technical teams of up to 45 people (onshore/offshore) and modernizing enterprise systems for Fortune 500 organizations. Skilled at turning around distressed projects, driving Agile/DevOps transformation, and reducing operating costs while improving system reliability and throughput. Actively applies AI-assisted development tools — Claude, Github CoPilot, and Grok — to accelerate business and technical documentation and to build AI agentic workflows that enforce coding best practices.

- Led senior management roles (VP, Director, Sr. Manager) directing distributed technical teams of up to 45 people across the U.S. and offshore delivery centers.
- Deep expertise in Azure cloud infrastructure, Infrastructure-as-Code (ARM templates), CI/CD pipelines, and enterprise DevOps transformation for Fortune 500 clients.
- Delivered measurable business impact: $1M+ in annual cost savings, a 50% reduction in vendor contract cycle time, and infrastructure scaled to 4M+ transactions/day.
- Early adopter of AI-assisted development platforms (Claude, Github CoPilot, and Grok), building agentic AI workflows that enforce coding best practices and accelerate documentation.
- Extensive leadership training in coaching, mentoring, team building, change management, and diversity and ethics.

CORE COMPETENCIES

- Cloud Infrastructure (Azure)
- Agile/Scrum Methodologies
- Process Development & Maturity
- Change & Release Management
- AI-Assisted Development (Claude, Github CoPilot, Grok)
- DevOps & CI/CD Pipelines
- Resource & Vendor Management
- Automated & Manual QA Testing
- Disaster Recovery Planning
- AI Agentic Workflow Design
- Application Architecture & Design
- Financial & Budget Management
- Security & Compliance
- Team Leadership & Mentoring
- AI-Enhanced Technical & Business Writing

PROFESSIONAL EXPERIENCE

Deloitte Services LP | Tampa, FL

Sr. Manager, DevOps Engineering (previously Manager, DevOps Engineering) *Sep 2017 – Present*

- Deliver DevOps consulting services to multiple Fortune 500 clients, serving as both team leader and hands-on contributor across engagements.
- Design and maintain Azure infrastructure through automated pipelines built on Azure Resource Manager (ARM) templates.
- Train business and technical teams on Agile/Scrum methodologies; provide technical leadership in scripting, automation, and ALM tooling including Azure DevOps.
- Diagnose and resolve issues across software builds, releases, and Azure IaaS/PaaS environments.
- Lead DevOps implementations spanning Windows, Linux, and Azure Kubernetes Service (AKS).

AgileThought LLC | Tampa, FL

Sr. DevOps Consultant *Sep 2015 – Sep 2017*

- Established standardized DevOps policies and processes for enterprise consulting clients.
- Built and maintained Azure infrastructure using the Azure SDK and ARM templates.
- Managed Visual Studio Team Services (VSTS) build servers and agent pools.
- Automated code delivery pipelines using PowerShell scripting and reusable modules.
- Diagnosed and resolved issues across software releases and Azure IaaS/PaaS infrastructure.

Jackson Hewitt Tax Service | Sarasota, FL

Vice President, Architecture & Engineering *Apr 2013 – Apr 2014*

- Led a 30-person development and architecture team, partnering with executive leadership to deliver key initiatives on schedule and within budget.
- Took ownership of a multimillion-dollar tax software modernization project that was 18 months behind schedule, offshore-managed by a third party, and affected by quality and communication issues.
- Turned the project around by adopting Agile/Scrum with Kanban, restructuring resourcing, and resolving architecture and design gaps — restoring a well-defined backlog and reliable status reporting.
- Cut vendor contract review cycle time by 50% by introducing SharePoint workflow automation and standardized document templates.
- Reduced problem-resolution time and improved cross-team communication by standardizing production support procedures.

FIS | St. Petersburg, FL

Vice President → Director → Development Lead → Senior Developer *May 1997 – Apr 2013*

Progressed over 16 years from Senior Developer to Vice President, culminating in leadership of a 45-person U.S./India technology organization.

- As VP, Credit/Fraud Midrange Development (2011–2013): Managed a 45-person US/India team; led migration of Fair Isaac Falcon Fraud Management from mainframe to client/server, supporting 750 transactions/second across all FIS North America card-authorization switches. Cut departmental expense by $1M+/year through offshore transition, and migrated all production applications to a new Active Directory domain with no business disruption.
- As VP, Quality Assurance/Architecture (2008–2011): Led a 45-person cross-functional QA, architecture, and process team; unified three siloed business units into one standardized organization later used as a model by the FIS corporate PMO; reduced regression testing effort while raising quality via automated testing.
- As Director, Credit Midrange Development (2003–2008): Led a 25-person team delivering a real-time mainframe interface with a data-driven mapping engine, eliminating hand-coding for API changes. Adoption helped secure agreements with three major financial institutions, doubling the platform's account base; system now processes 4M+ transactions/day at high reliability.
- As Development Lead / Senior Developer (1997–2003): Led teams supporting accounting, call center, client relations, and card production; built reusable components and logging/alerting frameworks adopted org-wide, and a resource management/time-entry system used for executive reporting.

EARLIER CAREER

- XCP Inc., Port Richey, FL — Development Lead (1995–1997): C++/Assembly firmware developer for credit-card-enabled vending equipment.
- Bytor Computer Services — Owner/President (1990–1995): Founded and ran an IT consulting firm serving Tampa Bay small businesses, including custom applications, network consulting, and business operations.
- United States Air Force — Precision Measurement Equipment Technician / Automated Test Equipment Developer (1984–1990): Calibrated and repaired precision electronic test equipment; developed automated calibration systems in Assembly, ADA, and C.
